Here's Fortune in Gold

NOT IMITATION gold-bricks, but the real thing. Together they are worth \$60,000 in Canadian currency. John "Jock" McNiven, manager at Negus mine, Yellowknife, N.W.T., prepares to ship mine's monthly output to Royal Mint at Ottawa. All shipments are made by air mail.

Gold Is Where You Find It, But It Doesn't Come Easy

Reg Hammond, The Bulletin's managing editor, and Staff Photographer Eric Bland, have flown hundreds of miles in the Northwest Territories to bring Edmonton readers tales and pictures of that fantastic north country which means so much to the future of this city. Here is the first of a series of articles by Mr. Hammond.

By Reg Hammond

YELLOWKNIFE, N.W.T.—Gold is where you find it, but according to John "Jock" McNiven, manager at Negus mine here, "When you find it you have to get it out and land it at the Royal Mint in Ottawa before you can collect the cash reward."

Lawrie Quits Zoning Board

S. T. Lawrie, chairman of the Zoning Appeal Board, today tendered his resignation to city council. The resignation is to take effect as from Friday.

Lawrie's resignation was forecast Friday by The Bulletin's city hall columnist, William "Spud" Murphy.

It is known that Mr. Lawrie has been dissatisfied with the attitude of the civic administration on zoning regulations.

Recently he complained of infractions of the one-family zoning bylaw, and requested that drastic action be taken against offenders.

He did not see eye-to-eye with the action of civic authorities in proposing to change the Civic Centre zone to accommodate a commercial building on the proposed Civic Centre site.

He came to Yellowknife in 1939, the year Negus started to produce. He's been here since, except for an eight-month period during the war when the mine was closed down. That was during 1944 and 1945.

It took considerable prodding to get him to talk about himself, but he did reveal a few facts that put him in the category of one of the settlement's most highly-respected citizens.

"Jock" McNiven is a member of the North West Territories Council at Ottawa, the governing body of the civic administration.

GOLD PRODUCTION at the rate of approximately 1,500 troy ounces per month comes from the Negus mine at Yellowknife, N.W.T. One of three producers in the area.

SWISH, RUSTLE

It's Sound Of Dress That Counts

HOLLYWOOD, June 12.—(AP)—Wear a dress that's wiled for sound, gals, then wait for the wolf call.

That's the advice of Hyana, the designer. She says it's not tiny waistlines, or exaggerated hips that make male eyes pop, but the seductive sounds of swish, rustle or crackle in the material.

"The melodic whisperings of yards of taffeta over the female form are more effective than gallons of subtle perfume."

"Men like women who wear materials that make tantalizing sounds. Taffeta, faille and under-petticoats of double buckram are as effective for snaring a male as a steel trap."

Even bathing suits and simple housefrocks will rustle by next year, she predicts, while the males rustle for the cash to pay for them.

Hyana designs for the movies, and personally for such charmers as Lauren Bacall and Evelyn Keyes.

Aircraft Will Drop 30,000 Sandbags on Trail Today

Edmonton In A Civic Mess

The lamentable conflict of opinion over the erection of a new hotel in this city is only the latest instance of the chaotic mess into which the civic administration has immersed Edmonton.

The paving program, the anti-mosquito campaign, the town planning set-up are all part and parcel of this civic mess.

Civic confusion has become so acute that it is obviously beyond the powers of present officialdom to straighten it out.

So the time has come for the bewildered and deluded citizens of Edmonton to demand a complete outside professional civic survey to establish a rational and progressive administration here.

There is no reason why there should be all this jockeying around about the projected new hotel. Edmonton needs a new hotel in the worst possible way.

The tourist trade has increased 26 percent in the past two months. Hotel space is pitifully inadequate in comparison with available accommodations in other cities.

But in the present mess, the critical need for a new hotel has to await town planning adjustments that should have been made years ago and would have been made years ago had the city possessed the foresight to engage professional leadership for the Town Planning Commission instead of relegating that body to the status of an amateur advisory board to which nobody has paid much attention.

The hotel project is in a mess because the town planning set-up is in a mess. No city council has ever taken the trouble to officially define the civic center area about which all the fuss is being made today.

And in that same hopeless mess are the paving program, the sewer system, the water distribution system and the attempt to abate the serious mosquito nuisance.

The city paves a little here and there, wherever there is the loudest and most insistent demand for it.

Similarly, the mosquito drive has been bungled. Instead of ditching and draining the breeding grounds of these pests, the only proved method, the city bumbles along with some amateur and ineffective plan with the result that citizens are driven out of their gardens and deprived of healthful recreation.

Even the pools on the undrained streets are propagating grounds for the insects.

Edmonton is in a civic mess.

If Edmonton citizens want to get their administration out of that chaos and confusion, they will demand an outside civic survey without delay.

Liberal Chief to Sue Saskatchewan Premier

MEADOW LAKE, Sask., June 12.—(CP)—Walter Tucker, Saskatchewan Liberal leader, said today he had instructed his solicitors to launch a suit against Premier T. C. Douglas for defamation of character.

In a prepared statement, Tucker said he would sue as a result of statements reported to have been made by the premier at a political meeting at Rosheim, Sask., last night.

Douglas told the meeting Tucker was a party to a civil action in which it was alleged that the plaintiff in the case had been fraudulently deprived of title to certain farm lands.

"I intend to sue Douglas and have instructed my solicitor in Saskatchewan to start proceedings against Douglas for slander," Tucker said.

"My reaction is that Premier Douglas feels he has lost the election and he is trying desperately to assassinate my character to gain his election ends."

The incident came just 12 days before a Saskatchewan general election.

Douglas told the meeting the case went before the courts last August but the presiding judge was recently adjourned hearing until after the provincial election.

The case was one in which a woman alleged she had lost her farm property as a result of a mortgage held by a Rosheim, Sask., investment company with which Tucker had been associated.

TRUMAN LIKES "OLD JOE" STALIN

EUGENE, Ore., June 12.—(AP)—President Truman said last night he likes "Old Joe Stalin," but accused the Soviet leader of making agreements that he cannot keep.

The President said that at Potsdam he "got very well acquainted with Joe Stalin."

"I like old Joe. Joe is a decent fellow, but he is a prisoner of the politburo. He makes certain agreements, but he can't keep them. They won't let him."

These remarks came at a station stop in Eugene, Ore.

Winter-Time Playgrounds Urged in Alta.

By DICK JACKSON
Edmonton Bulletin Ottawa Bureau

OTTAWA, June 12.—The move to bring pressure to bear through parliament on the Canadian Pacific and Canadian National Railways for year-round operation of Banff and Jasper, last night gained some eastern support.

The proposal first was advanced by West Calgary's Progressive Conservative M.P. Arthur I. Smith.

Support for it has come from Rodney Adamson, Progressive Conservative M.P. for West York, who sees Canada passing up a rich slice of an annual \$300,000,000 through failure to have full-scale operation of the national parks in winter.

The average American skier, he reported, spends an average \$100 on an outing, and with at least 1,000,000 devotees of the sport looking for places to go, the railways could hit a jackpot if they made a play for the winter trade.

He asked Transport Minister Chevrier to see how the railways might feel about a trial winter operation of the Banff Springs Hotel, Chateau Lake Louise and Jasper Park Lodge.

SEASON IS DOUBLED
"There's gold, gold American dollars, on those snowy slopes of the Rockies," he said, "and a tremendous field for tourist revenue if the three great hotels remained open the year round. The skiing season is just exactly double the summer season, and the winter tourists are no less wealthy."

He comes to Canada for perhaps a week or two and with plenty of money to spend."

Edmonton and northern Alberta will keep dry and warm over the next few days, the weathermen even though the so-called "sunny" south" stays damp.

Intermittent rain fell all Friday night in southern Alberta (Calgary got over one inch in the past two days, and will get it again today).

Cheerful forecast by the weatherman as 2:30.

"The rain area is spreading," he said. "Here are the cross-Canada temperatures recorded yesterday:

It Happened TODAY

World

Winston Churchill, the master of the pointed thrust, jibed the Socialist government in England for, as he said, being entirely dependent upon the generosity of the capitalist U.S.

In the U.S., a Senate House of Representatives committee, directed the Maritime Commission to make a study of the possibility of using huge commercial dirigibles capable of carrying hundreds of passengers and tons of freight.

In Chicago, immigration officials made one of the biggest hauls in history. They found 40 Mexicans who were smuggled into Texas and brought north in a false-bottomed truck.

The London Daily Mail "jolts" RAF officials today with the announcement that the Russians have gone all out to build the world's most powerful air arm, and now have four hundred bombers and a near-the-speed-of-sound experimental fighter.

The American publication, "Aviation Week," says motion pictures smuggled out of Russia revealed a Russian plane, capable of at least 748 miles per hour, and which has probably passed the speed of sound.

American officials in Berlin believe they have found the basis for Russian reports that the Yanks are feeding Germans horse meat. A variety of Mexican canned beef, being used in Germany, has a picture of a horse on the label.

In Ottawa, Eric Matthews got a bit angry, kicked a cop in the right leg, head, face and body as he was being loaded into a patrol wagon. He was fined \$200.

In St. Boniface, Manitoba, two youths, 18-year-old James Edward Campbell, Rochester, Minn., and 20-year-old Daniel Patrick Pato, were charged with the slaying of a hotel-keeper, Edgar Franecki, who died after beating allegedly administered by the pair.

WINSTON CHURCHILL
For Socialism, a Jibe
Toronto Better Business Bureau officials warned apartment hunters not to go for the old "stuffed flat racket." Too often, they said, the furniture brought to obtain the flat is worthless junk, for which the prospective tenant pays plenty.

In Argentina, the government has ruled that pay boosts granted to workers cannot be passed on to the consumer. The additional pay, they said, must come out of employers' profits.

National police in Korea claimed today that nine aircraft which bombed a Korean fishing fleet, killing 14 were American. U.S. officials denied that any of their planes were in the area but admitted they use the neighborhood for bombing practice.

Spinning Jet Plunges To Ground, Pilot Killed

OTTAWA, June 12.—(CP)—A whining jet-propelled Vampire, practising a high-speed roll for the annual RCAF air show, yesterday spun wildly and plunged into ground at nearby Rockcliffe airport.

Its pilot, 25-year-old P.O. R. A. Hodgins, of Campbell's Bay, Que., was killed as the plane struck the field and burst into flame.

This was the first time in Canada that a Vampire had crashed, killing its pilot.

Rewinestines said the craft, one of two Vampires in the skies, roared over the RCAF experiments, and proving station. The plane had circled the field several times. Then, as the pilot began a roll close to the ground, the plane developed a spin and nosedived into the field.

Bursting into flame, the Vampire was destroyed. Bits of wreckage were strewn over 100 yards.

Rewinestines estimated the plane's speed at about 400 miles an hour. They were uncertain of its altitude when it went out of control but said it was "really low."

It was the second crash of a service plane in Canada yesterday. A Royal Navy Sea Fire crashed at Halifax earlier in the day, killing the pilot.

Opium Price Set

SAIGON, Indochina, June 12.—(AP)—The Indochina government fixed the price of opium yesterday at between 14,000 and 20,000 piastres per kilogram (roughly \$550 to \$750 a pound). The government sells opium under regulations. The revenues pay part of local government expenses.

Wage Increases

AKRON, O., June 12.—(AP)—Firestone Tire and Rubber Company and the United Rubber Workers (CIO) signed a company-wide contract today providing for 11 cent-an-hour wage increases for 25,000 employees.

Jews Arabs Trade Violation Charges

UN Mediator Leaves For Headquarters on Rhodes

By Max Boyd

CAIRO, June 12.—(AP)—Count Folke Bernadotte, the United Nations mediator for Palestine, left today enroute to his new headquarters on the Greek island of Rhodes while Jews and Arabs traded charges of truce violations in the Holy Land.

He said the charges were being held out as a veiled threat of reprisal bombings against Arab capitals as he accused the Arabs of breaking the truce.

Bernadotte said he planned to fly to Amman, Trans-Jordan, and then to Jerusalem and later today to Rhodes.

He told reporters Swedish and American military observers had arrived in the Holy Land and gone to the scenes of reported truce infractions.

Israel, the Jewish state proclaimed when British gave up her mandate over Palestine May 15, since then has been fighting with invasion armies of Arab countries, helped by Palestine Arabs.

The mediator plans to return to Cairo Tuesday to begin talks with representatives of Arab governments.

In these talks he is expected to explore the possibility of getting Arabs to attend a peace conference with Jewish authorities and himself on Rhodes.

HAILED NOTE
Before Bernadotte's departure, he was hailed as a peace-loving representative here. It said their countries cannot "tolerate Jewish aggression" and warned that if such continue, "the Arabs will lose their patience."

The chief of operations of the Jewish last night command said in Tel Aviv last night Arabs had violated the truce on the northern, central and southern fronts. He warned that the Israeli army might strike back to regain any ground the Arabs took.

The Jewish operations chief described the first day of the cruise as "just another day" of fighting against the forces of the truce. In London the foreign office reported today that Count Folke Bernadotte has filed a formal request to use British ships and planes to help supervise the Palestine truce.

A spokesman said the request was made to the embassy in Cairo. He assumed Bernadotte, the United Nations mediator, wants the transport for by UN observers under UN authority.

to pour the first gold brick before the end of June.

Present capacity of the mill at Negus is 180 tons daily, but manager McNiven is looking ahead to 1949 when installation of more equipment is planned. With increased capacity and new methods of recovery, actual gold recovery from Negus will be boosted to 175-180 per cent.

McNiven said Negus' present production cost is \$18 per ounce.

The mine shaft is now down nearly 1,200 feet, with 13 operating levels at varying depths. Most recently opened is the 13th level at the 1,275-foot mark.

HAVE HYDRO POWER
Hydro power is supplied the settlement and mines from Consolidated's plant at Prosperous Lake, 30 miles away. Consolidated by the Dominion government of a much larger plant on the Snare river, 50 miles north of Yellowknife is now under way.

When completed it will provide enough electrical energy to take care of any new development in the area for years to come.

Meat Buyers' Strike Looms

(Continued from Page One)

the Americans can afford to pay more for meat than us—when we grow as much of it right here?" is a viewpoint held by many.

Report received from Montreal today describes a situation there as "peculiar." During the month of May, live cattle prices rose 12.5 per cent, while retail beef prices decreased more than five per cent.

REASON GIVEN
Reason for the decrease is given as "retailers are met with considerable resistance to higher prices, and have been slow in instituting sharp mark-ups."

Here are some of the comments received in a Bulletin survey of consumers:

"It's scandalous," said R. E. MacDonald, 1516 23 street, "to have such a situation in a country where we have so much."

Said Mrs. MacDonald: "I'd back a buyers' strike in a minute if there were enough people behind it."

Miss Florence Chappell, 12502 123A street: "Our family will have to cut down meat buying. I think selling prices should be re-imposed."

K. W. Greene, 1014 123 street: "Meat prices are high enough at present. A 25-cent-a-pound increase will practically prohibit the ordinary individual with a family from buying beef."

"I hope the situation is not as bad as expected."

EMBARGO SHOULD STAY
Mr. Greene said he thinks the embargo on cattle shipping to the United States should stay on, experience in prices."

Said Frank Toby, 11139 66 street: "With everything going up, we're more prohibited all the time. If they raise meat prices out of all reason, there will be a buyers' strike because people just won't be able to afford it."

Mr. Toby suggested that all government control (including the cattle-shipping ban) should be removed to "let the situation find its level and then drop."

"People will just have to find what they can afford and stop there," he said.

RN Pilot Killed
HALIFAX, June 12.—(CP)—Lieut. Nigel Douglas Fisher, 27, son of Admiral Sir Douglas Blake Fisher, formerly Britain's fourth in command, of Brackenhurst, Hampshire, Eng., was killed yesterday when his Royal Navy twin-engine biplane crashed in the harbor off McNab's Island.

Second Sask. Woman Is Cleared of Murder

YORKTON, Sask., June 12.—(CP)—Mrs. Nettie Thomas, 56, was acquitted yesterday of a charge arising from the fatal shooting of her husband in 1933.

Earlier this week 71-year-old Mrs. Hattie Ordinal was cleared of a murder charge, dating from 1923 when her husband, Peter, was killed by a shotgun blast.

Both women spent long terms in mental hospitals after being found mentally unfit to stand trial at preliminary hearings. Mrs. Thomas was in hospital 14 years and Mrs. Ordinal 25 years. During the years many of the witnesses for the two cases moved, died and disappeared.

Witnesses were brought hundreds of miles to testify at the trials.

Peter Ordinal, Mrs. Ordinal's son who was 13 at the time of the shooting, testified he shot his father after he found his mother brutally beaten. His mother was charged with murder as an accessory to the shooting and Peter spent two years in reformatory for his part in the affair. Witnesses told of frequent beatings Mrs. Ordinal received from her husband.

Several of Mrs. Thomas's children testified their mother had been mentally ill. They told of awakening to a gun blast and finding their mother with a 22-calibre rifle in her hands and their father lying bleeding.

Forces To Obtain Varsity Officers

OTTAWA, June 12.—(CP)—Defence Minister Claxton Friday announced a plan to obtain 210 highly-qualified officers for the armed forces, to be chosen from among student-athletes now attending universities.

Ten of them will get commissions in the navy, 125 in the army, and 60 in the RCAF.

Claxton said in a statement the plan is that accepted student veterans who will graduate in 1949 will receive permanent force commissions at the beginning of their first year of university.

The students will get full pay of a second lieutenant or equivalent. Tuition fees will be paid and allowances made for university books and equipment during the first year. This will be in lieu of monthly allowances now given to the Veterans Rehabilitation Act.

Two Charged With Murder

ST. BONIFACE, Man., June 12.—(CP)—Two men were charged with murder yesterday in the death May 31 of Edgar Frenette, 28, manager of a St. Boniface hotel, police chief J. H. Beaudry said.

The pair—James Campbell, 18, of Rochester, Minn., and Daniel Patrick Pato, 20, of Montreal—appeared before Magistrate Henri Lacroix and were remanded for one week.

Campbell and Pato were arrested June 3 at Kenora, Ont., and brought back to Winnipeg, charged with assault with intent to rob.

Two young women, Isabel Blanchette, 21, and Winifred Panekuk, 20, held as material witnesses, were arrested with the two at Kenora. At the inquest they testified that plans to rob the Park hotel were laid in a Winnipeg cafe where they had met Pato and Campbell May 29.

slating of a quartz vein exposed for 35 feet. First assays ranged from 96 ounces to 2.26 ounces of gold per ton, along with copper mineralization. High-grade shewing, 2.26-10.

New Gold Find Near Flin Flon

REGINA, June 12.—(CP)—Resources Minister J. L. Phillips Friday announced a gold discovery in Northeastern Saskatchewan near Denare Beach, 12 miles southwest of Flin Flon. He said the finding was narrow high-grade shewing, 2.26-10.

Thieves Net Cash And Beer in Raids

Thieves obtained a quantity of cash and six cases of beer in Friday night break-ins, according to police reports today.

Lee Pon, proprietor of a 118 avenue store, told police thieves netted \$60 in cash when they broke into the building early Saturday morning.

Entry was gained by springing the front door. Attempts were believed to have been made to force the rear door, police said.

The cash was taken from a till. Two dollars was in silver, the rest in bills.

A city visitor, Pete Venderwell, Keg Hill, Alberta, told police six cases of beer were removed from his truck while parked near a city hotel.

New Council To Take Over

Administration of the town of Beverly will be no bed of roses for Mayor Albert Hainsine and his six councillors, when they take office Monday.

Biggest thorn in the side of the new council will be money.

According to Francis J. Glossop, assistant to provincial administrator, Sydney V. Lea, the municipal coffers are empty.

"It has taken 11 years of hard work to lift Beverly out of the red," said Mr. Glossop, "and though there is no money on hand, at least the new council can start with a clean slate."

Because of the immediate need for money, tax notices already prepared by the government administrator, will be sent out just the same, and the rate will remain unchanged at 24 mills.

General feeling in Beverly is that the town will prosper under their new local administration than it did while being administered by the provincial government.

HSA Group Meets

Annual meeting of the Edmonton Council of the Home and School Association will be held on Monday, June 14, at 8 p.m. in the North Side public library. S. G. Douglas is president of the group.

WITH FREDDY MARTIN

Lumberjack-to-Singer Comes to Edmonton

Oregon lost a lumberjack when Stuart Wade decided to become a singer.

The popular vocalist with the Tony Martin band almost missed the boat when it came to singing.

He was offered a scholarship at the Cleveland Institute of Music, but wasn't much interested until teachers and friends persuaded him to accept.

One of the friends was Lawrence Tibbett.

He joined the Martin band in 1940, and has been with them ever since, except for three and one-half years in the U.S. Army.

Wade, with Freddy Martin's orchestra, will appear at the Trocadero June 16.

STUART WADE

Truck Driver Under Arrest

A truck driver who smashed into two vehicles and plunged through a railing on McDougall Hill was arrested by police Friday night.

Charged with dangerous driving is Robert Smith, Low Level Service Station.

According to witnesses, about 5:20 p.m. Friday, Smith was driving his truck down McDougall Hill.

John Findlay, 9643 100 street, told police he was driving his truck uphill, when Smith swerved over to the wrong side of the road and struck the left side of his truck.

George Maketuk, 12136 64 street, claimed he was driving his car uphill, behind Findlay's vehicle when Smith struck the left front fender of his car.

After striking the two vehicles, Smith is alleged to have swerved down the hill and crashed through the railing on the south side of the hill.

Four passengers in the rear of Findlay's truck were uninjured. They were E. Randall, C. Schultz, Eric Johnson, Bill Johnson.

Smith was uninjured and was arrested by police immediately following the accident.

Smith appeared in police court today and pleaded guilty before Magistrate A. I. Miller.

He was fined \$75 and costs and three months in Fort Saskatchewan jail.

Weapon Wielder Sent To Jail

Charged with carrying an offensive weapon, Peter Tymoschuk, Edmonton, was sentenced to three months in jail when he appeared in police court Friday.

Tymoschuk pleaded guilty to the charge in police court Friday, June 14.

Police arrested Tymoschuk in a city beer parlor June 3. He was found with an improvised black-jack in his possession made from a handkerchief and a piece of lead.

Radio Woman To Speak Here

MONDAY—Kiwans

TUESDAY—Gyro, Cosmopolitan, Y's Men's Club.

THURSDAY—Rotary, Optimists, Lions.

FRIDAY—Kiwans.

Kay Henderson, CFBN's women's editor, will address the Kiwanis Club, at its meeting in the Macdonald Hotel, next Monday, on the public service of radio.

Kiwansians will hold their annual baseball game Tuesday evening in Renfrew Park.

Plans and policies of the CBC in Alberta will be discussed by Alberta manager, Dan Cameron, at the meeting of the Gyro Club Tuesday in the Macdonald.

Reports of delegates to the Winnipeg convention of the Western Canada Federation of Cosmopolitan Clubs will be heard at the meeting of the Club Tuesday noon in the Corona. Elections of new officers will also be held.

Following a buffet supper in the YMCA Tuesday evening members of the Y's Men's Club will adjourn to a city playground for a softball game.

Interdependence of business and agriculture is the subject of an address to be made to the Rotary Club at its meeting in the Macdonald Hotel next Thursday. Speaker will be H. C. Ray, chief of public relations for the International Harvester Company. Chairman for the day will be Bert Hollingshead.

Kiwansians will meet at the County Club at 2:00 next Friday for an afternoon of golf followed by dinner at 7:00.

Stan Francis, radio entertainer, and the cast of the show "Punchin' Up" will be guests of the Lions Club at their meeting in the Macdonald hotel Thursday noon.

Road Closed

City Engineers Department announces closing of 105 street bridge, Watfordale Road entrance, starting Monday, June 14. Entrance to the bridge will be closed for one month.

STORY-BOOK ROMANCE of seven months was climaxed in Athens recently when former King Michael of Rumania and Danish Princess Anne of Bourbon-Parma were married in temporary chapel of Greek royal palace.

AMA Membership Tops All Previous Records

Membership exceeding all records was reported at the semi-annual meeting of the provincial Board of Directors of the Alberta Motor Association being held in the Macdonald Hotel.

According to reports submitted to the meeting, which opened Friday, total membership at its end of April was 26,534. This was composed of 17,500 regular and 12,034 associate members, and is a gain of 2,168 at the Calgary, Edmonton and Lethbridge branches during the six month period ending April 30.

Edmonton Branch of the AMA reported the highest membership of 15,532. Calgary reported a membership of 11,511 and Lethbridge 2,991.

Dr. G. J. Hope of Edmonton, president of the provincial association was chairman and reported the Association was generally in a healthy condition.

Reports of committees were discussed at the Friday afternoon meeting and more were scheduled for today.

A resolution of sympathy, to be extended to Mrs. W. A. Fallow in the recent death of the Hon. W. A. Fallow, was passed by the Board.

In Edmonton for the meeting are Maj. L. R. Lipsett, chairman of the Calgary Branch, with Z. W. Dean, James Gleave, R. H. Chauncey, Gordon Love, W. E. Hall, and L. M. Saint.

Also G. C. Paterson, chairman of the Lethbridge branch, with Charles Bany, first vice-president of the provincial Association, H. Cody, of Milk River, and C. E. Forster, manager of the Lethbridge Branch.

Edmonton directors attending are Alfred Byth, R. A. Gudson, C. H. Grant, R. L. Greene, Dr. G. J. Hope, president, Jack Houser, L. E. McQuarrie and Fred Turnbull.

EDMONTON BULLETIN, Friday, June 11, 1948

Here're Some Tips To Modify Home

Bulletin House Man Offers Friendly Advice

In building a new home, up-to-date plans, regular conferences with the architect, and personal tastes contribute to houses that are at once functional and decorative.

But what of the home that, while new to the people moving in, is by no means new to the rest of the world?

When a family buys an old house, they are bound to find faults in the layout and construction of the place, not noticeable at first, but definitely annoying as time goes on and one becomes familiar with its surroundings.

Many of these structural handicaps can be overcome!

In many cases, they can be overcome with little expense, carpentry or re-wiring—simply by proper arrangement of furniture, the right color schemes and "tricks"—which exist in home decorating as well as in any other art!

TOO LITTLE WALL SPACE? Perhaps an unused door can be locked off permanently and decorated with a textile wall hanging—or a plywood panel can be put over the entire door before papering is done.

Groupings of furniture can be brought out into the room, away from walls.

Try placing the desk, or table, with its end to the wall—pull the sofa out by the fireplace.

There are dozens of new furniture arrangements which the average family doesn't try, simply because the Smiths and the Joneses arrange their furniture along the older-fashioned lines.

Corner cupboards or book-shelves brought out into the room, away from walls.

Try placing the desk, or table, with its end to the wall—pull the sofa out by the fireplace.

There are dozens of new furniture arrangements which the average family doesn't try, simply because the Smiths and the Joneses arrange their furniture along the older-fashioned lines.

Protecting Alberta's Resources

The decision of the Hon. N. E. Tanner, minister of lands and mines, to establish a provincial committee to study natural gas reserves in Alberta is sound.

The provincial government, very properly, has always taken the stand that the export of Alberta gas could not be permitted until it was definitely shown that sufficient reserves existed to satisfy the needs of Alberta people and Alberta industry.

That policy was formulated last fall into an order-in-council when a Pacific Coast proposal was made to pipe Alberta gas into that province.

At present a Winnipeg syndicate is seeking authority to pipe gas to Winnipeg and intermediate points. Its application is based on the report of Dr. G. S. Hume of Ottawa and of the federal bureau of mines which expresses the opinion that Alberta gas reserves are "tremendous".

Rotary Promotes Knowledge

International Rotary is undertaking a benign task in establishing a \$2,000,000 fund for advanced study fellowships in the universities of the world.

It was once the extravagant hope that the exchange of scholars between universities of the different countries would promote world peace. The fallacy of that belief was demonstrated in the past two great wars.

Certainly the thousands of Canadian and British medical men who studied in Germany were able to do little to stop German aggression.

Christ Came to Sinners Only

The gospel passage commonly used in churches tomorrow is taken from the 15th chapter of St. Luke and contains the parable of the lost sheep.

It is probably one of the most beautiful parables in the New Testament and tells how the shepherd with a hundred sheep missed one of them and left the ninety-nine in the wilderness while he went out to look after the one that was lost.

It is a picture, of course, of Christ's mission in this earth. And it reveals two vital points in regard to Christ's view of men.

The first point this parable emphasizes is the tremendous value God places on the individual human soul. A man is not just a part of the human race. He is not just a unit in society. He is not a creature of the state. In his individuality he is a prized possession of God the Father.

And God the Son leaves the whole of society, typified by the ninety-nine well-behaved sheep, while He goes out

The application is opposed by the Alberta government and Mr. Tanner's present determination to have an independent provincial survey is the result of a need for more detailed facts upon which to base future provincial policy.

Mr. Tanner is to be commended for this businesslike approach to the situation.

Alberta has no intention of sitting, in dog-in-the-manger fashion, over huge gas deposits without sharing them with her neighbors.

But she has every intention of using these deposits for the development of Alberta first. Only the surplus over that need should be exported.

It would be manifestly ridiculous to pipe out of Alberta great quantities of gas which would be used to develop in other provinces industries that could just as well be developed within Alberta.

The real value of this interchange, as developed by Rotary, lies in the fact that the accumulation of knowledge from a variety of viewpoints is about the only way to secure unbiased and unprejudiced knowledge.

The standard of our Canadian universities, with some possible exceptions, is quite as high as that of any abroad. But the approach to knowledge differs in every institution.

The setting up of these Rotary fellowships will do a great deal to broaden education in North America.

after the one that has strayed away.

The second point stressed by this parable is that Christ's mission is not primarily to righteous people but to sinners.

He came down to earth because men had sinned. And He established His Church for the redemption and help of sinners.

Critics of religion frequently express amazement that the Church contains people who are far from perfect. If people were perfect, there would be no need for the Church; there would have been no need for Calvary.

"What man of you," goes the parable, "having an hundred sheep, if he lose one of them, doth not leave the ninety and nine in the wilderness, and go after that which is lost until he find it? And when he hath found it, he layeth it on his shoulders, rejoicing. And when he cometh home, he calleth together his friends and neighbors, saying unto them, Rejoice with me, for I have found my sheep which was lost."

By Harold L. Weir

Protest Vote No Asset To Any Political Party

It would be a blind and bigot mind that refused to admit a significant swing to the left in the political life of some parts of Canada.

But it would be an equally blind and bigot mind that refused to admit a significant swing to the right in the political life of some parts of Canada.

In case that sounds like a paradox let me amplify the statement a little by saying that the recent WEIR

There is no sound of the fact that hundreds of thousands of Canadians are living in an angry haze of discontent.

The fact that the source of their discontent is in most cases the government does not alter their inclination to blame their troubles on the legislators.

Ridiculous though it may be, there is still a disposition to believe that any ill may be remedied by passing a law and that one can ride into the kingdom of heaven on the back of a statute.

Thus, the political party in power must play the scapegoat for all the misfortunes that assail mankind.

There is nothing new in this. Indeed, it is a human failing that as early as the human race, if not earlier, the tendency to blame the misfortunes of the world on the government has been known.

Canadians are burned up, for instance, because the makers of the federal budget decided to deplete the national treasury of declaring a public dividend in

weight behind a Socialist party. But certain factors have mitigated that repugnance.

The CCF has capitalized on all this discontent, together with the fact that the CCF has a formula for meeting these problems, but by aggravating the social annoyance with cloying sympathy.

Judgment Is Duled

In pre-war days when people thought in terms of political doctrine and not in terms of the grievances, many of the malcontents would have been horrified at the idea of throwing their

Newlywed: "Darling, without allowing my love is a thing, I like to ask you to have liver and bacon some night soon. I'm getting tired of chocolate cake."

"Halt! Who goes there?"

"Advance Charlie Chaplin, and don't be so funny next time."

Friend—But isn't your son sort of jittery, Mr. Moneybags?

Mr. Moneybags—Heavens, no, he has a list of blondes, a list of brunettes, and a list of red heads.

It was a terrific boxing match. Fifty thousand spectators cheered themselves hoarse as the boxers stood toe to toe and slugged each other with dynamite rights and lefts.

Suddenly one of the men crumpled to the canvas. The crowd went mad. The boxer took a count of three and then got up. In a few seconds he was floored again. The crowd went crazy. Fifty thousand voices rose in one great sustained roar.

The Thrill That Comes Once in a Lifetime By Webster

LETTERS TO THE EDITOR

Dogs Don't Know Rule

Editor, Bulletin—Dogs apparently do not know the Golden Rule, even if their owners do. They are allowed to roam at will over gardens snapping at anyone to whom they take a dislike.

The nice quiet dog that plays with the children on the street, often savage, when a stranger passes.

JUSTICE FOR ALL

Edmonton.

Discrimination Against North

Editor, Bulletin—May I add my congratulations to the great many your paper must have already received on your splendid editorial on the mail service to the Canadian North.

This discrimination has made it so that a great number of people down here have lost interest in the North and all they desire now is to get out and stay out.

G. P. JOHNSTON.

Want More "Uncle Nat"

Editor, Bulletin—My sincerest admiration for your discrimination sense of humor in printing the column of Nathaniel Gubbins.

To my mind it would be an excellent idea of remedying the situation by taking up your editorial page for more writings of "Uncle Nat."

When one has finished with the more tedious issues of the day, "Uncle Nat" is a welcome and relaxing change. I take these, as I were, "for dessert." I. G.

Edmonton.

Democracy Is Too Soft

Editor, Bulletin—As a serious student of the methods adopted by the Russian Soviet in dealing with political opposition to the present system of government, I have come to the conclusion the democracies are remiss in their duties to the state in failing to adopt similar methods in dealing with subversive activities because these are certain the most effective.

For the first time in their history, the Russian Soviet, Gen. Charles de Gaulle and the French Communists are political bed-fellows today, a fact that refutes the truth of the old axiom.

Neither De Gaulle nor the Communists approve of a plan to unify Western Germany.

The general's political party, the Rassemblement du Peuple Français, is the strongest opponent of Communism in France. Vice versa, De Gaulle is the man whom the Reds hope is least likely to succeed.

Nevertheless, and for totally different reasons, they find themselves lined up together today on the German issue. Together, they may be strong enough to bring about the dissolution of parliament and to cause a general election and a new government.

And so the question again arises in the minds of millions of people on both sides of the Atlantic: Is Charles de Gaulle another dictator-in-the-making?

The answer, I believe, is "No." And I would hasten to emphasize that that is a strictly personal opinion, not shared by all the

fective. They are the only methods understood by those responsible for such activities.

While I do not altogether agree with the Soviet use of the firing squad, now abandoned in favor of slave labor, I think the democratic could very well adopt the latter method of dealing with subversives. And what could be more fitting than that the very active people be compelled to use their own hands in developing the natural resources of the countries concerned?

S. T. F.

Edmonton.

Apathy Ruins Edmonton

Editor, Bulletin—This letter is addressed as a challenge to the city administration.

We are living in the now—today. It is the duty of a government to take the long range view of meeting present needs, with construction big enough and solid enough to take care of Edmonton's growth for a very long period ahead.

Paving as an example—the policy of "spreading thin," of laying light layers of cement on a thin sub-foundation of crushed rubble does apparently make a little money and cement seem to go a long way, and may look like a big economy to our city fathers.

But what about the future? I submit that the "future" caught up to us 25 years ago—whole streets of so-called pavement crumbling into rubble and mud. Heaves, blisters and sinkings over almost every square yard of the city.

Driving has become hazardous—holes with razor-sharp edges to cut tires, pitch car, driver and passengers—crossings of traffic.

Our city fathers, with their engineering brains, staff and energy so fully occupied with their far here and there, have left here, and leave 10 until they get "had enough to merit flunk."

Send the gravel boys out of a morning with a mixture of sand, clay and tobacco juice to keep the buses rolling—spread a layer of gravel and spit on a wheelbarrow of cement here!

Ruinous economy. Or take water, Edmonton, with unlimited supply, our city fathers with a mandate to provide facilities—for future development, not just existing houses—

The real trouble is rooted and entrenched in the arm-chair, horse and buggy thinking of our city commissioners, department heads and council members.

Throttling conservatism, apathy, and lack of vision, inability to imagine, and lack of initiative to build for future needs. Desire to show a short range utility "paper profit" and to board funds instead of expending them with courage, economy, and faith in the future of a disease—but they are not the disease.

There is the disease! I address this challenge to the city administration, past, present and future, of Edmonton.

Let us correct past mistakes as rapidly as possible, let us not repeat them. Let us exercise sound long-range planning sense. Let us build for the future, and initiative into the City Hall. Let us support persons and policies which are alert to the "real present and future needs of the most rapidly expanding city in the Dominion."

W. H. H. CHURCHILL, Box 4072.

That trait alone would disqualify him as a potential dictator. He won't make deals. He won't trade horses. And if he owns a back-scratcher, he has never been known to use it.

His mental powers are unquestioned. His history may show that he had an almost clairvoyant vision of the future of Europe.

OUR TOWN By Jack Scott

Immigrants Are Often Deceived

A pack of back mail to catch up on and, first, let's clear up the problem of the writer who wanted to know if there's an Old Man Mountain in British Columbia.

The answer, courtesy of a couple of dozen folks, is no. Old Man Mountain is a peak in the Maines Range near Jasper. V. H. V. Shepperd writes you stand on the railway platform facing East and look nearly half a mile out to see the mountain, which takes its name from its similitude to an old man reclining.

Mrs. M. L. Peterson, of Jasper, says the mountain is also known as Roche Bonhomme.

Some amusing letters on the rigors of street-car transportation, including an amusing verse from Gordon Grant. Haven't the space for putting it in the conventional form, but here's how it goes:

"Coffee finished, grab your hat. Out the door, a minute flat. Slippery sidewalk, down you go, three point landing, down a show. Oops a daisy! Spirals spiral. Not the time to dilly dally. There's the trolley, hit the road. Sacramento! What a lull! Wiggle through a seething mass, the underprivileged class.

On the landing, breathing deeply, diplomatic act discreetly. People! People! What a battle! What a mob of human cattle! Each one with his own intention, disregarding good convention.

There's that woman with the torso and her girl friend, even more so. Try and budge such huge proportions. Can't be done with all contractions. Lose your balance, knees are shaky, C'mon mister! Wakey, wakey! Every stop, another jerk. Save your money! Walk to work!"

Hears From Angry Scot

Several letters on my criticism of a certain type of immigrant from England. The most amusing is from a John Webster, who dresses me with simple dignity as "Dear Pig." Here's his comment: "I agree with you on at least

one thing. British immigrants certainly come as advertised. The hope is rapidly dashed to the ground, at least in the west, where one sees the blatant lack of integrity in government and the obvious lack of any real or political conscience of the people.

"The misinformation in part comes from the 'live shooting' of Canada's armed forces when they spent many comfortable years in Britain."

"Take it from me that the younger immigrants from Scotland, at any rate—don't come out here because of the irritations of life at home. A tradition of emigration from Scotland is a driving force for many."

"While we are on the subject of Canada, it sickens me to see the pompousness of 'Vets'—many of whose service was limited to zombie-land and totality wasted a couple of years. 'Vets' want this Vets must have that." Post Vets!

"Which all reminds me of the Canadian lady I met on the train coming out here. She was the war was terrible out there," she said. "You know I didn't see a banana for nearly four years."

"Finally, don't think for one moment I'd leave Canada. Certainly not! I'm going to stay out and do my best to improve your territory. It certainly needs more for many."

And J. R. P., who came to Canada in 1911, feels that many of our newcomers are coming here without knowing the true conditions. "I do know that some of the propaganda and advertising in the early years of this century was so misleading that many newcomers were greatly disappointed," he writes.

"When war broke out in 1914 a tremendous number of young men came out here, many of them too glad to join up and get out of Canada. In fact, I believe about 75 per cent of our First Division were men who had only come to this country a few years before hostilities commenced."

From the Files

LOOKING BACKWARD

1888—60 Years Ago The funeral of Sir John Bolton, who died at Ft. Saskatchewan took place on Sunday at the Edmonton cemetery.

Last mail brought in a letter from W. R. Lloyd, one of the Edmonton party bound for the Yukon delta, Alaska. About sixty men were waiting there for the lake to freeze hard and thaw out.

Elmore Bros. left the Landing with two boats full of goods. Sunday's rain turned to snow.

1908—40 Years Ago

New York—The Lusitania has again smashed all records for the Atlantic crossing, making the passage in four days, twenty hours and fifteen minutes.

Fifth annual convention of associated boards of trades of Western Canada will be held at Medicine Hat next week.

Mrs. Humphrey Ward, the British novelist, who has been touring the west, has returned to Montreal.

The new Norwood school will cost \$80,000 and debentures to that amount were provisionally authorized at last night's meeting of the school board.

1918—30 Years Ago

Paris—American troops brilliantly captured Belleau Wood. Berne—A telegram of an official nature is being spread broadcast in Germany stating that the admiralty is considering a big naval defence.

Winnipeg—Allens of military age are being put into non-commissioned service in the Canadian army.

Matches will go up in price on Monday.

How should I pour true love know.

From another one?

By his cockle hat and staff,

And his sandal shoon.

He is dead and gone, lady,

At his head a grass-green turf,

At his heels a stone.

White his shroud as the mountain snow.

Larded all with sweet flowers.

Which—up to the grave did go.

With true-love showers.

—Shakespeare.

appeal was made last year through newspapers and periodicals to raise money for funds and books to establish a number of reading centres throughout the British Isles. The response was very good and some 8,000 English books have already been collected. Within the next three months it is planned to open further lending libraries in Hannover, Düsseldorf, Wilhelmshaven, Cologne and Bonn.

Rombardment with fast electronic shot from a capacitor is one way to sterilize things without heating them.

Separating coal from slate and other heavy waste rock is made easier through the use of a suspension of finely ground crystalline limestone, which floats the coal but lets the heavy waste sink.

My mind has thunderstorms. Until I hear the heavy hours. My thoughts are drooping flowers.

And I am, silent birds.

Yet come, dark thunderstorms. And build a way home. For when you rain me words, My thoughts are dancing flowers.

And joyful singing birds.

—William H. Davis.

DDT Recommended As Poison for Accidents

The use of DDT, to prevent traffic accidents has been urged by the National Safety Council. Only this DDT is not the famous bug killer.

It means Defensive Driving in Traffic, and it's a potent poison for traffic accidents. It's the smart way to drive, long practiced by the best professional truck and bus drivers but not common enough among average motorists.

To give more drivers an understanding of the defensive driving technique, the Council is co-operating with state and city officials to give it public attention in August with the theme "Don't Rely on the Other Guy."

AVOID OTHER'S ERRORS

Defensive driving means more than just obeying traffic laws and avoiding mistakes in your own driving. It means also being able to avoid accident situations caused by others.

The Council says you are a defensive driver if you can answer "yes" to the following questions: Although you have the right of

way at an intersection, another car is coming fast along the cross street. Do you slow down and stop if necessary?

The driver ahead holds out his hand. Do you stay behind until you are sure of what he intends to do?

You are driving along a residential street and see children playing on the sidewalk. Do you slow down and keep a sharp eye on them?

DRINKING ADDS DANGER
You've had a couple of highballs at a party but feel fit as a fiddle. Do you ask someone else to drive?

You are approaching the crest of a hill. Do you slow down, keep well to the right and alert for the approaching speed demon who is trying to pass a truck on the other side of the hill?

The night is wet and dark. Do you cut your speed so you can stop in the distance your head-lights illuminate?

The trick of defensive driving is to concentrate not only on what is happening, but on what may happen, the Council said.

What's Octagonal Traffic Sign Mean? Better Learn

Motorists wise should use their eyes.

But not all of them do, the National Safety Council says, and as a result there are a lot of accidents from failure to heed traffic signs and signals.

The Council is making a special effort in June to call the nation's attention to the importance of highway markings with a "Signs of Life" educational program. State and city officials and other interested agencies are cooperating.

WARNERS OF DANGERS

"Signs and signals are among the biggest helps to safe driving," said Ned H. Dearborn, president of the Council. "They give drivers warnings of the dangers that lie ahead. But they are worthless unless they are seen and obeyed. It is only when signs are heeded that they really become 'signs of life.'"

The Council said the safe driver will follow these signposts:

1. Give signs, signals and markings the same respect you would a traffic officer. Here's one place you may lose if you cheat.

2. Reduce speed and be on guard when you see a diamond-shaped sign (this shape carries a warning) or a round sign (this signifies a railroad crossing is ahead).

3. Come to a complete stop at an eight-sided or octagonal sign.

This shape means only one thing—stop!

4. Know what an oblong sign means. This shape carries regulatory messages such as speed limit.

5. Heed the cross-buck sign at railroad crossings. If there is a flasher or wig-wag, wait until it stops operating before crossing. There may be another train you can't see.

6. Watch for the signs of life even on familiar roads. Three-fourths of the drivers in fatal accidents lived within 25 miles of where the accident took place.

Safe Parking Urged

San Francisco recently reported an average of 34 runaway automobiles a month due to improper parking on hills. The National Safety Council says that while few cities are as hilly as San Francisco, motorists generally are unfamiliar with the proper technique for parking on inclines. In addition to setting the parking brake, the front wheels should be cranked sharply toward the curb if headed downhill, away from the curb if headed uphill.

In June and July, about 1,200 persons will drop each month, if past experience holds true this year, the National Safety Council says.

Going on Vacation? Remember This:

Before You Leave.—

1. Stop milk and other deliveries. Phone THE BULLETIN and ask them to have the paper sent to your holiday address. Ask a neighbor to have advertising circulars off your porch.

2. Don't leave your shades. If you are to be gone three weeks or more, arrange to have your lawn mowed. Fertilizers watch for such tip-offs.

3. Notify post office to hold mail, or arrange delivery to a neighbor.

4. Lock windows and doors. Remember basement windows and coal chute.

5. Shut off gas and water at main valves. Shut off electricity at master switch unless refrigerator or food locker is to be left on. If current must be left on disconnect lamp and appliances at wall outlets. If refrigerator is disconnected, leave door open to prevent mold.

6. Inform police how long house will be vacant and where you can be reached in emergency.

7. Service car thoroughly, with close attention to safety features such as lights, tires, steering and windshield wipers.

8. Put a first aid kit and flashlights in glove compartment. Be sure you have all fire tools.

On the Way.—

1. Speed kills—take it easy. Start a little earlier and don't try to cover too great a distance in a day.

2. Long drives at constant speed wear you down. Vary your speed and stop occasionally to stretch your legs.

3. Be sure you understand driving techniques in different localities. For example, using the motor compression to assist braking is necessary in mountainous country. A good rule is to use the same gear in descent as grade as you used in climbing it.

4. Don't be impatient to make time. It's unsafe and it's not resting driving. Watch your passing, on a mountain road you may have to poke along for miles before it is safe to pass.

5. Signs and signals are not uniform in all states. Read them carefully. They are your best safeguard on strange roads.

6. Scenery can be taken in small doses from a moving car, but if you want to drive dry and of nature's beauty, pull off the road and stop.

7. If you leave the children alone in the back seat, be sure the doors are locked.

After You Arrive.—

1. Re-lax—Don't try to crowd a year's vacation into two weeks.

2. Take the sun in easy doses. Don't nap in the sun. Wear sunglasses.

3. Stay out of the water for at least an hour after eating and swim in sight of others. The sure water is deep enough and free of obstructions before diving. Don't try to swim too far.

4. Distribute the load evenly in boats. Don't stand up. If you fall out and the boat stays on an even keel, climb in over the stern. Most boats won't sink, so stay with it until help comes if it capsizes. Check the weather before going far on a large lake.

5. Don't spill gasoline while filling an outboard motor. A small amount of gas may spread on the hull, set the motor boat afire when the motor starts.

6. Don't sample berries, touch unfamiliar plants, or drink impure water.

7. Carry an insect repellent with you.

8. Stay away from high ground and single trees in a lightning storm.

ders in and about the home, according to the National Safety Council. Over-reaching, unsteady placing and defective ladders are common causes.

Kerosene Leads List Of Household Poisons In Number of Deaths

Sneak killers lurk in virtually every Canadian home, the National Safety Council says. These killers are poisons, which claim more than 2,000 lives a year. Small children under five are the most frequent victims.

Guard against these sneak killers in three places, where the Council says they usually are found: Bathroom—medicines and drugs. Kitchen—cleaning, bleaching and disinfecting compounds. Basement or garage—insecticides and kerosene.

Kerosene's poisonous character

Radio Review

By Don Flach

Getting anxious about television? Then for the sake of your blood pressure, the best advice is to remain calm, cool and collected.

In a best authority, it will be two years before there will be a television broadcasting station in Canada, and it probably will be longer than that before it comes to Edmonton.

Might as well give up all notions of midnight vigils in front of a television screen trying to pick up New York, Toronto or even Calgary as in the old days of radio. The horizon is the limit so far as direct television broadcasting is concerned.

At the present time there is an estimated dozen television receiving sets in Canada, and most of these are experimental jobs in the hands of radio manufacturers. All are located in eastern Canada within the horizon limits of some of the 13 U.S. television broadcasters operating.

Fifty-four further licenses for television broadcasting in the U.S. have been granted and another 64 are pending.

In Canada, three applications for licenses have been received by the CBC's Board of Governors. Consideration of two applications was deferred and the third was refused.

As for its opinions on television, the board in a statement issued, believes that television is likely to become a very important part of broadcasting and may eventually partly supersede straight sound broadcasting in some areas.

In line with fundamental radio policies laid down by parliament, the board believes television should be developed in Canada so as to be of benefit to the greatest possible number of people; so that public air channels should be used in the public interest; and with the overall aim of stimulating Canadian national life and not merely providing a means of providing non-Canadian visual material in this country.

The CBC board believes that public television in Canada should not fall behind developments in other countries. However, it has yet to appeal to parliament for the special financing needed for the initial development period.

One advantage resulting from the CBC's reluctance to explore on public funds lies in the fact that much of the costly experimental work will have been completed by the manufacturers and the equipment will have gained a degree of standardization.

With the technical side of television well in hand the next big headache of the producers is programming.

Because of its action, sport is proving to be the salvation of the early television programmers.

Studio programs, because they must be seen as well as heard, are presenting additional problems.

Television actors must, of necessity, commit their entire production to memory, and their appearance as well as their voice must be acceptable to the medium.

Colors under the burning lights of the television stage present some weird effects when viewed on the screen making additional problems for the technicians.

When all the story is told for the next several years at least, the savings account looks to be the best place for the several hundred dollars you've been hoarding for a television receiver.

Another development of modern radio-frequency modulation will be available to Edmonton listeners within the next week or two.

Installation of the new CKUA FM transmitter is now in the test.

Health Spending Vital Contribution

Minister Tells Steps Taken
By Dept. to Raise Standards

By D'Arcy O'Donnell

OTTAWA, June 12.—(CP)—Contributions toward improvement of health services are contributions towards Canada's national defence, Health Minister Martin said yesterday in the commons.

Head of a department that will spend \$67,000,000 more than the defence department this year, Martin said the money will contribute to the welfare of the country. He made the statement during study of his estimates.

REVIEWS ACTIVITIES
The minister reviewed the various activities of his department. He made these points:

1.—Health department experts do not know of any known cure for arthritis.
2.—Some 27 separate researches into possible cures for cancer were started in Canada last fall.
3.—The federal government has offered to pay dollar for dollar with the provinces in the treatment of persons threatened with the loss of eyesight.

HOPE FOR CURE
While no cure has yet been found for arthritis, he hoped that as a result of the treatment of veterans at Sunnybrook Hospital in Toronto something would be found that could be passed on to civilian sufferers.

In discussion of the trade department estimates, Trade Minister Howe said the government is considering a scheme to finance construction of tourist accommodation in selected areas.

Land Sales Continuing

Fifteen land sales, made by the city land department in the past two days, totalled \$25,339.

Resulting from these sales 77 homes, with an estimated value of \$509,000, will be erected in different parts of the city.

Eight of the sales were to city contractors working under the Dominion government's integrated housing plan.

Six sales were made to individuals building their own homes. One sale was for extension of home site.

Mr. Brennan, long-time resident of Edmonton, is finance manager of C. Woodward Ltd. credit office. He is a member of the Gyro club.

Warnings had been issued by the Alberta department of agriculture previously that few combines would be needed to cross the international line this year.

First "Tot Lot" Opens In City

Edmonton's first "Tot Lot" opened in the Elmwood Park district recently.

The lot is primarily designed for children of from three to eight years of age.

Special tot-lot equipment, consisting of a jungle gym, teeter-totters, slide and swings, is expected to arrive about the end of June.

Mothers of the district are co-operating with director Clare Shankman in supervising play of the children.

Two volunteers assist in the supervision each afternoon. Pending the arrival of playground equipment, children are being taught games, singing, handicrafts, ball and tumbling.

Folled shorthorn cattle are becoming increasingly popular in Australia. The breed produces a type of bullock for trucking to distant markets.

SPORTS BULLETIN

10 EDMONTON BULLETIN, Saturday, June 12, 1948

ON THE FARM

With Ted Horton

Farmers should make early reservations on equipment for spraying 2-4D, the new chemical weed control, officials of the Alberta department of agriculture said today.

Demand for sprayers is likely to come "all at once" explained W. Lobay of the department's pest and weed control branch.

Delay in the arrival of normal spring growing weather has meant that weeds, from one end of the province to the other, are in the same stage of development.

Experts in the use of the chemical weed killer recommend the use of the spray when the prostrate weeds are in the bud stage and wild mustard have become too bulky and when the crop in which the weeds appear displays the greatest tolerance to the poison.

In a normal season travelling sprayers, working on a custom basis, could start at the international boundary and work their way north keeping pace with the weed development.

But not this year.

So book reservations soon for the weed sprayer. Or get one yourself might be good advice.

The grasshopper menace has reared its ugly head at widely separated spots in Alberta.

Reports from southern Alberta are that in some spots, close to the Saskatchewan border in particular, the little grasshoppering insects are becoming "difficult".

Fort Vermilion in the northern section of the province is also regarded as a danger area.

What to do about it.

Department of agriculture officials report a new chemical known as toxaphene, applied as a spray to suspected ground, effective in other parts of the country. This method of control has not yet been effectively tested in Alberta.

A mixture of fluocillic acid and sawdust is said to work effectively in this province.

A Jersey cow has done it again. D. M. Cole, Vegreville district youth is listed as owner of a senior Jersey heifer which established a new production record of 8,301 pounds of milk, 691 pounds of butterfat, with an average test of 8.05 per cent in a 365 day period.

The animal rejects in the official name of Green Maple Betty Process.

A senior two-year-old record was established by another animal owned by the same young man.

AT THE AIRPORT

It's Airforce Day At City 'Drome

Air traffic to Alberta, and Canada's other, northlands is starting its seasonal upswing.

Within the past week more than 10 flights, apart from regular daily Canadian Pacific flights, went winging northwards with supplies and personnel for northern industries concentrated in and around Yellowknife.

With increased northward flying for larger administration facilities at Edmonton's airport is once again brought to the fore.

Ask any employee working in the airport administration building and one can really see just how cramped quarters are.

The present "admiral" building, erected in 1942 at a cost of \$55,000, has just about outlived its usefulness.

It houses, among other offices, the government, and scheduled airline offices and the control tower, with every outfit continually desiring discount and confusion that reigns on a busier-than-usual day.

Useful reports at the airport have it that two Eastern architects are making a survey of the situation, or at least have been making a survey, but to date nothing has happened.

With the focal centre of the air world moving more and more to the east, the time has come

for a new airport.

My Mother Says Moths Are Bad!

RIGHT you are, Little Lady! Moths are bad — so bad that they destroy millions of dollars worth of garments every year. But tell your mother that she can be protected from moth damage from now on — it's all thanks to our NEW Moth-Proofing Process. We clean clothes thoroughly — and in addition insure them against moth damage for a period of six months! Moths needn't worry any longer.

Planes Diverted To Flooded West Coast

Passenger Traffic Speeded As Planes Move Heavy Loads

Canadian National Railway passenger service between Edmonton and Vancouver was speeded up today with patterns being flown direct from here to the coast.

More than 25 westbound passenger trains who arrived in the city this morning enroute to Vancouver, were scheduled to be flown from here today on two special Trans-Canada Airlines flights.

Passengers are also being flown from Vancouver to Edmonton.

The section of the transcontinental train arriving here this morning continued on as far as Prince Rupert and then being flown direct out of the mountain region.

C.N.R. passenger officials said today that they were only selling tickets for train as far as Prince Rupert on the line west of Edmonton.

Direct rail connections are made as far as Hefley, B.C., but passengers bound for Hope then have to transfer to buses for a short distance, and then board another train as far as Hope.

The special C.N.R. service will continue daily until better service can be provided.

Reporter-Turn-Cop Is Jack Wilce's Fate

Here's one newsmen who "made good."

From pounding a typewriter on a news beat Jack Wilce, former Bulletin reporter is now pounding pavement as a rookie cop.

Jack, who chased crime as a police reporter for three years, is now in a city constable's uniform. He is a straight 40-hour week Jack, like most rookies, is starting out on the night shift from 7 p.m. to 7 a.m.

"All I see in my sleep is doors, doors, and more doors," said Constable Wilce after his first night's tour of duty.

An army veteran, Jack enlisted in 1939 and went overseas in 1941. He served with the 2nd Brigade Signals through Sicily, Italy and Northwest Europe.

Following discharge from the army in 1945, Jack joined The Bulletin staff as a reporter.

For more than two years he covered fires, accidents and crimes as police reporter.

Active in athletics, Jack plays

JUMBO'S MASTER IS A PETITE UNIFORMED WOMAN

NO BACK SEAT-DRIVER Peggy Sheritt manages with ease the large mobile, so essential to the Red Cross Mobile Clinic. A member of the transport division petite Miss Sheritt drives the mobile over country road and

highway alike to reach rural communities throughout Alberta. Painted a bright blue, the mobile is familiarly called "Jumbo." All equipment used for mobile clinics is carried in the large right-hand drive vehicles.

Canadian Red Cross Mobile Clinic Shows Efficiency on Northern Tour

By MARGARET WEIR

Mobile clinic they call it. A mobile unit it is. Shining blue vehicles, trim uniformed young women, sterilized equipment. And everything bearing a label, a red cross.

It was the Red Cross Mobile Clinic northward bound on a routine trip. Amazed I watched a petite young woman climb with agility into "Jumbo." I found was the mobile, the woman a member of the transport division. The huge truck transports all equipment required at the clinic.

Maybe a man's job. It is no back seat driver who handles the vehicle with the right-hand drive. Jumbo leads the parade, setting the pace of an average 30 miles per hour.

Refrigeration panel truck generally follows. Equipped for storing blood, the temperature is kept between 35 to 38 degrees F.

Bringing up the rear of the procession and the essential personnel is the station wagon. Delivering the goods is the responsibility of the transport. Equipment and personnel are transported to and from destinations.

But it is upon arrival in a town that action begins.

I watched tongue-tied as an assembly-line of women formed. Back doors of the mobile were flung open. Someone had scrambled inside. Mattresses, blankets, pillows, even collapsible beds and stools were whisked from girl to girl.

Drums of tubing, crocks of soap and asepsis solution, bowl-stand and basins emerged from Jumbo.

In less than 45 minutes the town's Memorial Hall was transformed. The meeting place of townsmen had become the working place of the Red Cross.

Resting beds, bleeding beds, wash stand, dressing table, stools. All were in order in jack-rabbit time.

The Red Cross had arrived. Open for business was their cry.

A similar story could be told of operation "closing out." The same efficiency, the same speed, the same co-operation.

Fifteen minutes after the last donor had given his blood the 12-woman clinic was ready to roll with the required pints of blood stored in the refrigeration truck.

And they call women the weaker sex!

Photos by
ERIC BLAND
Bulletin Staff
Photographer

BOTTLED BLOOD—RESULT OF A DAY'S WORK

CAPPED PINT BOTTLES OF BLOOD are unloaded from the refrigeration truck to the depot by Lila Brand, left, and Janet Rowan, right. Each rack contains ten pints of blood properly primed and ready to be taken to the lab. Temperature of the truck must be between

35 and 38 degrees F. Any change would spoil the blood, so necessary for the saving of lives. Each pint bottle contains 120 cc of anti-coagulant and 380 cc of blood. It is the responsibility of the transport division to ensure the safe arrival of the bottles at the city depot.

WOMEN TODAY

Dolores Kimball, Editor

EDMONTON BULLETIN, Saturday, June 12, 1948 15

PRICKED FINGER IS STAGE NO. 1

PRICKING A FINGER is Donna Cross, technician at the Edmonton Depot of the Red Cross. Miss Cross, a recent graduate in science from the University of Alberta is one of the five 1948 graduates employed at

the city depot. At present she is receiving special training at the depot. This is the first operation performed on the donor. The brand smile of donor Eric Graham indicates that being pricked with a lancet doesn't hurt.

One of Two Mobile Blood Clinics in Canada; Blood is Taken from Donors All Over Province; Serum and Plasma Needed for Alberta People

By MARGARET WEIR

FTFS—not breakfast, tea and supper—but Blood. Transfusion Service. Blood for transfusion—a public service. Such is the BPS. One of two in Canada, the Red Cross Mobile Clinic in Alberta travels throughout the province. Rural communities are visited. Clinics are set up. Blood is taken from donors just as would be done in any city clinic.

Upon registering as a donor, samples of blood are taken from the donor. As a safeguard to the donor, a trained technician tests the haemoglobin of the blood by placing the sample in a copper sulphate solution. This test determines whether or not the donor is physically fit to give blood. Now the blood is typed. Using anti-A and anti-B serums the classification of the blood is determined. Donors are classified into four groups, O, A, B or AB.

Preliminaries now over, the donor is taken to a bleeding bed. Local anesthetic is given, the taking needle is put in the vein, the flow of blood begins.

To prevent the blood from clotting, the pint bottles contain 20 cc. of anti-coagulant. Generally 80 cc. of blood is taken from the donor.

Both the pint bottle and small tube for specimens are labelled with the donor's group.

When the bottle is filled it is taken to the bottling table. There it is capped, slowly rotated to prevent clotting and placed in a rack ready to be put in the refrigeration truck.

Small tube containing a specimen of each donor's blood, labelled and corked is also placed in the refrigeration truck.

Rh test and the Kahn test for syphilis are made on the specimens. The pint bottles are ready for immediate use.

Between the doctor and the donor conversation these days centres around six-legged mosquitoes. Favorite quip was that mosquitoes had gotten the jump on the Red Cross.

All equipment is sterilized for the protection of the donor. Special care is taken with the materials on the dressing table.

A white gown member of the nursing unit handles the syringes, anaesthetic needles, clips and transfusion towels with rubber gloves. Cleanliness is foremost.

From bleeding beds donors go to resting beds. Then comes the cup o' tea and the crumpet.

Four minutes is the average time required for the bleeding operation. Within 20 minutes after the donor has registered he is ready to leave the hall, minus his donation of blood, but feeling no different than when he entered.

Forty donors can be put through the clinic hourly.

A medical doctor, graduate nurse, technician and members of the nursing unit are responsible for the operation of the clinic.

A service worthy of your patronage. A service as necessary today as in 1942.

Counting Tricks Is Good Insurance

By William E. McKenney

With the great success achieved by Cincinnati, O., in their recent Midwest regional championships tournament, it would not be surprising if they were to invite the national championships to Cincinnati one of these days. They have not had a national since 1935, yet

Romania Industry Is Nationalized

BUCHAREST, June 12.—(UPI)—

In a surprise move, Romania nationalized practically all industry in the country, as well as its mines, oil wells and other natural resources. The sweeping nationalization bill was adopted by the cabinet at a closely guarded secret meeting this morning. It was presented to parliament without previous warning at 11:30 a.m., and was passed unanimously with only about three hours debate.

Woman Acquitted Of Murder Charge

YORKTON, Sask., June 12.—(UPI)—

Mrs. Hattie Thomas, 56, Friday was freed of a 15-year-old murder charge resulting from the fatal shooting of her husband. A King's Bench Court jury deliberated 35 minutes before returning a verdict of not guilty. Mrs. Thomas was released from custody after the jury brought in the verdict.

Kiwanis Post

LOS ANGELES, June 12.—(UPI)—

Don H. Marden of Winnipeg has been elected vice-president for Canada of Kiwanis International now in convention here.

When West played low she was in dummy with the jack of diamonds and lost the king. West won this trick and took the jack of spades. Again Mrs. Wallace refused to hold up, winning with the ace of spades.

Then she cashed her two good diamonds and played the king of clubs. When West brought the last she knew she was on the way to victory. She led a small club to the ace. West abandoned out, so Mrs. Wallace led a small club to the ace. West abandoned out, so Mrs. Wallace led a small club to the ace.

Canada's Clean-Up
Gaining Wide Fame

Fame of Canada's annual spring-time beautification campaign has spread to other lands and may have come Canada for a display of beauty to other countries.

Philip Pugsley of Montreal, executive vice-president in charge of beautification for the Junior Chamber of Commerce of Canada, reported on his return from Rio that international delegates showed considerable interest in the way in which the Canadian campaign is conducted.

Mr. Pugsley, who led the Canadian delegation to the Rio Congress, has been nominated president of the Canadian organization which soon will hold elections at the national convention in Winnipeg.

Leduc's Rogue Won't Behave

Behaviour of Leduc's rogue well has again taken an unexpected turn. When the Alberta Petroleum and Natural Gas Conservation Board permitted continued production from the remainder of the field for a 10-day test period it was hoped that the flow from Atlantic No. 3 would diminish or, at worst, stay at a consistent rate of production. The 10-day period expires Tuesday and so far the well has done neither.

For a few days it seemed that the miracle had happened. Production suddenly dropped to between 3,000 and 4,000 barrels daily—well within the quota of 6,000 barrels per day allowed it. Then just as suddenly, however, the flow began to pick up and the production rate rose to over 10,000 barrels per day again. It was still at that rate on Friday.

Reason for the violent fluctuations in the rate of flow from the well is not known with certainty but it is thought likely that cratering in the hole is responsible. With all the pressure at an uncontrolled rate there is bound to be a considerable amount of sand and lime being broken off and accumulating at the bottom of the hole. The constant flow through the rock will be eroding the pores and making this possible.

PRESSURE BUILDS UP
The accumulation will be blocking off the 133 zone at the bottom of the 5,300 foot hole and from which most of the oil comes. The pressure of gas probably builds up until it forces a hole through the shale and permits the oil to flow. The capacity production from the zone.

Officials at the well have learned to anticipate the unusual. Atlantic No. 3 has been treated with acid to open up the pores so that it should be able to absorb oil at rates up to 200 barrels per hour in case the rogue went on another production test.

As a result the high rate of production of the well will have no effect on the schedule for the rest of the field. The surplus is going back into the earth through the oil-laced water at the bottom of Atlantic No. 3.

PUMPING CONTINUES
Meanwhile water has been pumped into Imperial No. 48 at approximately 1,500 barrels per hour. This attempt to flood the well with water has been proceeding for 10 days. It is estimated that over 600,000 barrels have gone into the 133 zone through the pores so that it should be able to absorb oil at rates up to 200 barrels per hour in case the rogue went on another production test.

Officials are considering slowing down the rate of injection to see if

DOLLAR SAVING POLICY WORKING

OTTAWA, June 12.—(CP)—Canada is slowly shutting the taps on the drain of her resources of United States dollars—lifeline of international commerce.

Though \$48,000,000 more were run off in April, the Bureau of Economic Warfare showed that in the first four months of the year was little more than half that of the same time last year.

Dollar-conservation measures, the report indicated, saved Canada some \$140,000,000 in the four months.

LIVESTOCK TRAFFIC

EDMONTON, June 12.—Total receipts of cattle trucked, driven and shipped by rail to local livestock agencies on June 11: Cows 8, calves 243, calves 86, hogs 523, sheep 20.

Shipments on June 10: To Eastern Canada, 4 cows hogs, 2 cows cattle, 1 cow cattle and hogs.

Coarse Grain Prices Weaken at Winnipeg

WINNIPEG, June 12.—(CP)—Oats and barley futures displayed weakness on the Winnipeg Grain Exchange, reflecting declines on the Chicago grain markets due to good rains reported in the United States winter wheat belt.

Local and commercial buyers, liquidation, along with heavy hedging pressure, forced coarse grain prices down on the Winnipeg exchange, buying dried up as the fairly active session proceeded.

July rice dropped the maximum (lowest limit) and October also moved lower on selling by American interests.

Class two wheat prices were reduced two cents from Friday's level. The only export business reported, 812,000 bushels of wheat were allocated to the United Kingdom under the Canadian wheat agreement, being to 2,570,000 bushels the total for that country during the week.

Gardiner Says No Decision Made On Lifting Cattle Ban
ASSINIBOIA, Sask., June 12.—(CP)—Agriculture Minister Gardiner said today no decision has been made on lifting the embargo on beef cattle shipments to the United States.
The Dominion government for some time has been considering lifting of the ban "but as far as I know no decision had yet been reached."
He was commenting on reports the ban would be lifted Sunday. Gardiner said the ban was not a decision made by the federal government but a decision made by the United States. He said the ban was not a decision made by the federal government but a decision made by the United States. He said the ban was not a decision made by the federal government but a decision made by the United States.

Russ Veto Likely On Atomic Plan
LAKE SUCCESS, June 12.—(CP)—Russia's veto in the 20-month history of the United Nations is expected to be used Wednesday when the Security Council meets again to discuss the problems of the Atomic Energy Commission.
Yesterday, the anticipated Russian attack on the United States proposal that atomic weapons be scrapped only after effective controls are developed for atom regulation was foretold to materialize. Gardiner said the veto was not a decision made by the federal government but a decision made by the United States. He said the ban was not a decision made by the federal government but a decision made by the United States.

Brooklyn-Born Israeli Leader Killed In Action
NEW YORK, June 12.—(UPI)—An Israeli spokesman in New York announced that Colonel David Marcus, 47-year-old Jewish-born supreme commander of Israeli forces on the Jerusalem front, was killed in action Thursday night.
VANCOUVER, June 12.—(CP)—Alfred P. Hemingway, 41-year-old real estate broker, returned from a tour of duty in the Korean War on a charge of murder early today, shortly after police found the body of a woman in a rooming house in his room in an east-end Toronto boarding house. He had been slain by axe blows to the head.

Board Adjourns
MONTREAL, June 12.—(CP)—Mr. Justice J. C. A. Cameron of the Exchequer Court of Canada, chairman of a mediation board hearing a wage dispute between the railway and the Canadian National Railway Brotherhood, announced today that the board had adjourned its sittings until June 30.
Whites Owned
WHITECOURT, June 12.—Roy Reeves has bought the Whitecourt hotel from R. Anderson. He plans to make some improvements on the building when he takes over on July 1.
The male mosquito is strictly a vegetarian and does not bite.

TRUMPETER SWANS REPORTED AT ROCKY
ROCKY MOUNTAIN HOUSE, June 12.—Frank Strause and Alfred Paskal were driving across the Clearwater river, two miles south recently, when they saw three large white birds swimming on the river about 150 yards from the bridge.
As the car stopped, the birds took off from the water and headed north. They had black tips on their wings and might be snow geese, but they seemed too small to be geese. The description of "Trumpeter Swans," but these swans have never been reported before.
There are far more birds, large and small, around here than in usual, many of them birds that are not common here. Among them is a flock of pelicans.
